

Prospect Program Facilitator Selection

What is Changing

Instead of simply securing available local coaches as facilitators, the program will work with the High Performance (HP) Director to identify targeted coaches.

These coaches will:

- Work at clubs developing **national and international-level skaters**
- Align with the **technical coaches** involved with Team Sask

Why This Change Is Being Made

The goal is to provide **strong skating fundamentals** to athletes accessing the program by targeting coaches that come from clubs that produce **national level skaters**.

Benefits for Athletes

- Exposure to coaching methods used at the **high-performance level**
- Consistent messaging about technique and expectations

Prospect Program Facilitator Selection

- Stronger preparation for athletes aspiring to **Team Sask**

What This Means for Athletes and Coaches

Facilitators will be selected strategically to align with Team Sask coaching expectations. This approach provides pre-competitive athletes with access to the same high-level coaching methods used with Team Sask athletes, helping prepare them for the podium pathway.

This approach also allows recreational skaters to experience high-quality coaching practices used within the provincial podium pathway, supporting strong skill development and introducing athletes to higher-level training standards.
