

Prospects Program

Registration Process Update

What is Changing

Previously, participants registered once for all Prospects Program events. Beginning in the 2026–27 season, each event will have its own separate registration.

Why This Change Is Being Made

This update improves program administration and flexibility. Separate registrations allow organizers to:

- Keep registration open longer for individual events
- Better manage attendance numbers for each session
- Adjust planning based on participation levels
- Provide flexibility for families to register when they know their schedules. ** Remember, sessions may fill up if you register later.

Benefits for Participants

- More flexibility if skaters cannot attend every event
- Easier tracking of event participation

Prospects Program

Registration Process Update

- Better organized sessions based on confirmed numbers

What Participants Need to Do

Skaters and families will register separately for each Prospects Program event when registration opens in April.
